PRODUCT RELEASE NOTES

LABELVIEW™ Version 7.04

LABELVIEW 7.04 delivers new functionality, fixes and corrections, new printer drivers, and printer-specific fixes and corrections that have been made since the release of version 7.03. This release notes document highlights the features and corrections made in version 7.04; the release notes for previous versions can be found on the Teklynx website at www.teklynx.com.

Pricing and part numbers for version 7.04 remain the same, as detailed in the version 7 pricing sheet. LABELVIEW 7.04 is available in three main editions: Basic, Pro and Gold. All editions are shipped with an English Quick Start manual, security key and CD.

New Features

LABELVIEW Enhancements

- Added "Media Tracking" functionality to LABELVIEW Gold edition. Media Tracking allows you to track label stock usage and report that usage information via e-mail to a designated recipient. See the LABELVIEW 7.04 online Help for information on how to activate and configure Media Tracking.

Pocket LABELVIEW Enhancements

- Added support for the Denso BHT200 device.

New Printer Drivers

LABELVIEW 7.04 includes new drivers for the following printers:

Fixes and Corrections

General

- Fixed issue with the cycleBaseX function leaving off zeros.
- ISO Week Number is now calculated correctly.
- CycleNumber function now counts correctly with Windows printers.
- Turkish version Demo no longer displays incorrect information.
- Fixed issue occurring when using Label Select with a label containing a field that has more than 100 characters.
- Fixed problem with creating a text field using the Scaleable Pro Spaced font.
- Fixed problems with Print to Picture functionality.
- Text now displays correctly in License Manager.
- Fixed problem with PresentLabel setting.
- Changed naming of files when using Acrobat Distiller so that each has a unique name.
- Fixed problem with command line LABELDATA option.
- Changed CommWatch to not accept a second scan until the first one has been processed.

Bar Codes

- When using an extended (X) driver, the program will no longer automatically draw a box around ITF-14 bar codes.
- Program now includes the Application Identifier (402) for Bill of Lading numbers. AIs were also added for 12, 241, 251 and 403.
- Fixed problem with the check digit printing when the bar code was blank.

Printing

- Fixed issue with labels created in previous versions being mistakenly regarded as Extended (X) drivers and being converted unnecessarily.

Database

- Fixed issue occurring when opening labels that use ODBC text file links.
- Fixed problem with not being able to update non-key field when using dBase.

- Fixed issue occurring when using an Informix database through an ODBC connection.
- Fixed memory error when connecting to large Informix databases using the data grid.
- Fixed problem with OLE DB when managing multiple connections.
- Fixed problem with runtime error when unable to find key when using OLE DB and accessing three tables.
- Fixed problem with When Printed prompt not appearing from Quick Printing screen when using ODBC.

Pocket LABELVIEW

- Fixed centering and alignment issues.
- Replaced PPEConfig.ini file with proper Pocket LABELVIEW version.

* Known Issues for Pocket LABELVIEW: Variable 2D bar codes are not supported with Pocket LABELVIEW or PrintPad.

Printer Specific Fixes and Corrections

Automated Pkg

- Fixed problem with extended ASCII and command files.
- PI404i: Fixed print speed issues.

Markpoint

- EAN128 now uses correct Markpoint reference code of 43.

Sato

- Sato 8485se: Fixed alignment issues.

TEC

- TEC B 472 (V): Fixed issues with Expand Height & Width not being reflected on the screen.

Zebra

- HT-146: Fixed problem with Code 128 B and Code 128 C bar codes changing to Code 128 Auto-Switching when the label was saved.
- TLP 2844: Fixed issues with printing Arial and other TrueType fonts.
- Zebra 140 XI III PLUS: Fixed issues with black mark sensor settings.
